

## Real-Time and Allocation Workflow

### Step 1

Employees clock IN at the start of shift, completes tasks throughout the day and clocks OUT at the end of their shift.

Clock IN

Clock OUT

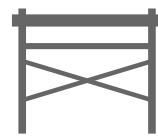

Tasks completed throughout the day

### Step 2

Supervisor allocates time to tasks at the end of the shift/day.

Clock IN

Task 1  
2.5 hrs / 150 ft.

Task 2  
1.5 hrs / 250 SF

Task 3  
4 hrs / 400 ft.

Clock OUT

Real-Time  
& Allocation

WorkMax Real-Time and Allocation workflow allow supervisors to break up accurate time into tasks performed with units produced. Quickly assign time/tasks/units to an entire group with bulk allocation. Your business gains accurate real-time labor worked, GPS timestamps with tasks, units completed, and job costs.
