

# Integrated Project Certainty

## WorkMax BY FOUNDATION SOFTWARE

Integrated Cost, Quantity, and Resource Management

Centralize Project Cost and Productivity Management

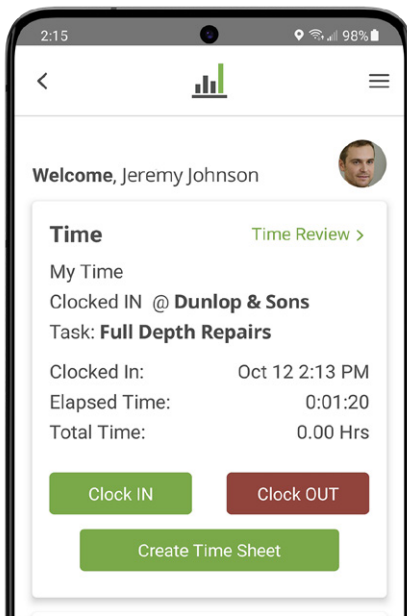

Integrate Field Productivity

Integrate Earned Value Labor, Quantity and % Complete

Mobile Device Field Progress, Cost, Productivity

Eliminate barriers to collaboration

Unalterable audit trail

Eliminate multiple solutions with centralized, integrated, project management to ERP, Schedule, and Estimating. Integrate Progress, Time and Productivity without acquiring new solutions, reducing complexity.

### Integrated Cost, Quantity, and Resource Management

empowers field, back office and stakeholder teams with on-pace crew, work type, and job code productivity.

### Centralize Project Cost and Productivity Management

Integrate estimates, work plans, and schedules to manage cash flow across all projects.

### Integrate Earned Value Labor, Quantity and % Complete

Collect and share Quantities, Materials, Man-Hours, Equipment Hours, and % Percent Complete. Real-time updates with Oracle P6, SAP, Dynamics, CMIC and other solutions for centralized Earned Value Management Reporting. Calculate estimated actual costs. Manage Earned Value results from work performed and duration of

Eliminate project and department silos with centralized hours, units, and percent complete in real-time from the field. Push actual hours/units back to estimates for planned to actual results. Communicate with schedules for updated baselines with actual hours, units, percent complete and production rates.

### Integrate Field Productivity

Past, Present and Future productivity is visible at the task, job, work package, project and company level. Integrate with estimates and schedules to manage planned vs. actuals. Empower field teams with by-the-hour updates on how work is progressing. Display current pace at or behind planned work pace to stay on budget, and on schedule. "Project Pacing EVM"

the effort. Produce an estimated earned cost to compare actuals to planned work and budgeted costs.

### Mobile Device Field Progress, Cost, Productivity

Protect labor budgets and schedules with decision-making powered by insights from real-time productivity tracking software in the field. View production unit of measures, estimate quantities and hours, actual quantities and hours by cost code, phase, location, crew, project and more.

### Eliminate barriers to collaboration

Connect teams with a unique data ownership model that maximizes adoption, collaboration, and data sharing across the entire project, creating a complete project record in one system.

### Unalterable audit trail

Track and capture every project decision, ensuring accountability and minimizing disputes.

“WorkMax has made the audit process very smooth, very easy... It was smooth, and seamless, and super easy. What else do you want from an audit?”

Holly Reynolds, Martin Zombek

### Integrations

ERP, Schedule, Estimating, Project Management, Real Time Location Systems

### Mobility

Smart Phones  
Tablets  
Kiosks  
RFID

### Media

Video  
PDF  
Images  
Audio

### Security

AWS Hosting

WorkMax empowers businesses to make better decisions with accurate live field data for labor, production, equipment, safety, and field reporting by connecting mobile workforces.
